Forecast for Sunday 30 Jun 2024

Weather: Some clear spells through the early hours but largely cloudy through the day. Some brighter spells at times but also the risk of the odd shower, these tending to be fairly light. Winds fairly light but feeling somewhat cooler.

Chance of cloud-free hill tops above 800m: 30%.

Low Cloud and visibility: Cloud bases around 700-900m for much of the day, frequently shrouding the higher tops and bring some poorer visibility, particularly in association with passing showers. Generally excellent visibilities at lower levels however.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Conditions changing quickly with elevation and some significant wind chill possible at height so be prepared if heading to the higher tops. Strong sun and high UV levels also likely in any brightness through the middle of the day.

Forecast for Monday 01 Jul 2024

Weather: Largely cloudy with spells of rain likely during the morning, and these persisting on and off into the day.

Maximum wind: Westerly 15-20mph gusting 25-30mph

Chance of cloud-free hill tops above 800m: 20%.

Low Cloud and visibility: Largely cloudy with periods of low cloud down to 400-500m at times, and spells of rain and drizzle particularly early and late in the day bringing some poor visibility at height. Visibility better at lower levels, particularly during the afternoon.

Temperature: **Valleys:** Plus 11 Celsius, rising to 14 Celsius.
At 800m: Plus 6 Celsius, rising to 8 Celsius.
Freezing level: Above summits.
